At East Coast Eyecare, we are a full scope optometry practice with a focus on complete ocular health. Our practice opened in 1979 and we have been your community eye doctor in Clareville ever since. We are able to treat patients of all ages, from as young as six months up to senior citizens. Though we can provide routine eye exams and offer a huge selection of new eyewear, our main focus is on the importance of your overall eye health. Our doctors are dedicated to keeping your eyes in great condition.
